

SmartBiz ADSL and ADSL2+ Next Generation Broadband

Adam Internet's ADSL2+ range of services are a revolutionary step for Internet connectivity in Adelaide. These high-speeds services allow access to streaming media, large websites, VOIP and a wide range of other Internet applications that have previously been impossible with traditional technology.

ADSL/ADSL2+ provides both data and voice over the same pair of copper wires, meaning you can be permanently online and also use your existing analogue (phone, fax, eftpos, etc) devices at the same time.

Adam Internet has its own AdamDirect ADSL2+ active exchanges in South Australia providing Next Generation Broadband right now for your Business needs. AdamDirect services are capable of download speeds of up to an incredible 24 Megabits per second and upload up to 1 Megabit per second. AdamDirect allows you to get faster speeds at longer distances from your telephone exchange, and also in some cases enables you to get ADSL where previously it was unattainable.

SmartBiz ADSL services are especially designed to include a professional-grade ADSL connection with a wide range of speed/data options, ensuring that you get a plan that suits your exact requirements. Our SmartBiz services also include access to our premium business helpdesk to ensure that any queries are addressed as quickly as possible.

Our SmartBiz ADSL services include :

- ✓ **A Static IP Address with option to add additional IP Addresses if required**
- ✓ **Supply of business grade hardware with firewall protection**
- ✓ **Priority Business Technical Support**
- ✓ **Disaster Recovery dialup 24x7**
- ✓ **Local Call National Roaming (50hrs pa FREE)**
- ✓ **Hot swap ADSL equipment**
- ✓ **Choice of either a Shaped (fixed price) or Premium (always full speed) data allocation**
- ✓ **4 Email addresses**

SmartBiz services have a low once off setup fee of \$129 and includes the Exchange Activation of the ADSL service on your telephone line.
